EXPERIENCE

Chelsea Ames has extensive experience in providing peer review, building enclosure commissioning (BECx), and construction observation and troubleshooting services for new construction projects ranging from multifamily residential projects to arenas. Ms. Ames has also worked on various projects involving the investigation and design repair of distressed materials and assemblies in both contemporary and historic structures, which provides valuable insight to preventing enclosure problems in new construction work. Ms. Ames performs evaluations of brick masonry, stone, concrete, metal panels, stucco, aluminum and glass curtain walls, roofing, waterproofing, and air barrier systems.
